a) The probability that a blue counter is removed from a bag is 0.3. There are 18 blue counters in the bag. Work out the total number of counters in the bag.	a) The probability that a blue counter is removed from a bag is 0.3. There are 18 blue counters in the bag. Work out the total number of counters in the bag.
b) The probability that a blue counter is removed from a bag is 0.3. There are 80 counters in the bag in total. Work out the number of blue counters in the bag.	b) The probability that a blue counter is removed from a bag is 0.3. There are 80 counters in the bag in total. Work out the number of blue counters in the bag.
c) The probability that a blue counter is removed from a bag is 0.45. There are 18 blue counters in the bag. Work out the total number of counters in the bag.	c) The probability that a blue counter is removed from a bag is 0.45. There are 18 blue counters in the bag. Work out the total number of counters in the bag.
