

Finding the mean from a table

1. Find the mean of the rainfall (1dp)

Rainfall in cm (r)	Frequency (f)
12	10
13	8
14	6
15	4
16	1

Mean = 13.2

2. Find the mean speeds of these runners (1dp)

Speed in s (s)	Frequency (f)
20	12
21	15
22	14
23	18
24	22

Mean = 22.3

3. Find the mean height of these seedlings (1dp)

Height in cm (h)	Frequency (f)
2.1	2
2.2	4
2.3	3
2.4	5
2.5	8
2.6	4

Mean = 2.4

4. Find the mean distance run (1dp)

Distance in m (d)	Frequency (f)
100	21
110	25
120	30
130	45
140	46
150	49
160	50

Mean = 135.7
