

Question						
Formula	$a^2 + b^2 = h^2$	$a^2 + b^2 = h^2$	$a^2 + b^2 = h^2$	$a^2 + b^2 = h^2$		
Substitution	$3^2 + 4^2 = h^2$	$6^2 + 9^2 = h^2$	$10^2 + 5^2 = h^2$	$\underline{\quad}^2 + \underline{\quad}^2 = h^2$		
Calculate	$9 + 16 = h^2$ $h^2 = 25$	$36 + 81 = h^2$ $h^2 =$	$\underline{\quad} + \underline{\quad} = h^2$			
Solve	$h =$
